## **PressONE Establishes Presence and Interconnection to the Intelligent Cloud EcoSystem in 111 Town Square Place**

*World-Class Data Center Selected for Strategic Location,  
Carrier-Neutral Global Connectivity and Newport Cloud Ecosystem  
of Fortune 50 and Financial Companies*

**New York, NY – September 9, 2015 – [111 Town Square Place](#)** (111TSP, formerly known as 111 Pavonia), the premier carrier hotel, and intelligent cloud ecosystem in Newport, New Jersey, announces today that [PressONE](#), a provider of business voice and data solutions, has established a Point of Presence (PoP) at the world-class data center facility, enabling enterprise businesses to access multiple cloud solution providers through its meet-me-room. 111TSP, developed and fortified by affiliates of LeFrak, provides PressONE with access to Newport Center, a flourishing enterprise ecosystem and smart city that is home to the area's Fortune 50 and financial institutions.

111TSP, the closest NJ-based carrier hotel to New York City, is the region's preferred location for mission-critical IT infrastructure, supporting top-tier institutions, telecommunications companies, managed / cloud service providers and colocation facilities. 111TSP's communications infrastructure, which includes fiber optic cabling and increased access to ducts for enhanced connectivity, provides a gateway to an extensive number of diverse and redundant networks serving the New York City metro area. By establishing a PoP inside 111TSP, PressONE gains access to an intelligent cloud ecosystem and fortified smart city infrastructure. The PoP provides PressONE with modern infrastructure, complete with colocation, Internet and transport services, enabling on-net delivery of its hosted PBX service, Unified Communications (UC), backup, and business continuity solutions to 111TSP's broad ecosystem, including all Newport enterprise tenants.

"Joining the 111TSP ecosystem is an exciting development for our organization," states Allan Schwartz, Executive Vice President of PressONE. "It allows PressONE to expand into Jersey City as a local provider, enabling us to continue our 30-year tradition of providing the highest level of telecommunications services to our valued clientele."

111TSP's carrier-neutral global connectivity, access to a highly secure and robust cloud ecosystem, and strategic smart city location were critical determining factors in PressONE's decision to choose the data center for colocation, Internet, and transport services. In doing so, PressONE establishes local on-net capabilities that enables it to

deliver the high-quality assurance, responsiveness, and on-site support that exceed end-user expectations, while gaining access to Fortune 50 companies, including global financial institutions.

“We are pleased that PressONE has selected 111TSP to provide enhanced communication services in order to expand its reach into the New York-New Jersey metro area,” adds Marylou Berk, Head of Commercial Real Estate at LeFrak Commercial, a worldwide leader in real estate development and the managing agent for 111TSP. “This development is proof positive that this premier data center facility offers businesses a wide scope of services in a prime location, with greater connectivity and freedom of network options.”
